Subject Index, Volume 12, 1958

Subject	*Page*
Actomyosin in fish and beef muscle, effect of dehydration on	410
Albumen, egg, methods for depleting glucose from	186
Aluminum from can maker's point of view	487
Analytical methods to determine shrimp quality	340
Annual Meeting papers, comments on presentation of	636
Anthocyanin pigment, removal of excess of, by enzyme	517
Antibiotic-treated meats, effect of radiation on	582
Antibiotic treatment, effect of, on storage life of turkeys	660
Antibiotics, effect of, on *Pseudomonas fluorescens, Pseudomonas fragi, and Pseudomonas putrefaciens*	263
Antibiotics in the salmon canning industry, potential application of	132
Antibiotics, tetracycline, in fish preservation	108
Antifungal agents for maintaining freshness of raspberries and strawberries	562
Antioxidant treatment of paperboard for increased shelf life of packaged dry cereals	589
Antioxidants in malt and malt sprouts	33
Apple grades, evaluation of experimental processing	554
Apple juice, radiation pasteurization of, effects of sodium sorbate and ascorbic acid on	156
Apples, dehydrocanned	417
Apples for applesauce, determination of relative value of, and evaluation of experimental processing apple grades	554
Applesauce, a volatile acidic flavor component of	613
Applesauce, determination of relative value of apples for	554
Applesauce, trimming time and yield factors in processing of	57
Army (U.S.) feeding of, future	667
Baby foods, colorimetry of	273
Bacterial flora of fresh meat	197
Bacterial inhibitors, effect of, on shelf-life of fresh fryers	147
Beans, green, processed, effect of MSG on flavor of	372
Beef aged in controlled environments, shrinkage and organoleptic characteristics of	86
Beef cuts, retail, frozen packaged, effect of storage conditions on color of	663
Berries, (strawberries and raspberries), maintaining freshness of, using selected packaging and antifungal agents	562

Subject	*Page*
Beta-carotene, coloring fat-base foods with	527
Beta-carotene, coloring water-base foods with	536
Bias, informational, in flavor preference testing	12
Bibliography of space feeding	459
Blanching, hot wind	315
Blueberries, clumping in canned	99
Bread, wheat-and-rice, new type of	15
British Army foods, prepared	699
Broilers, eviscerated, re-use of chill-tank slush ice and effect on market quality	257
Bruising, effect of, on quality of freestone peaches	196
Bulk transportation of citrus juices	579
Canadian Armed Forces, prepared foods for	470
Canned bread, frozen, moisture migration in	268
Canning processes, effect of variation with temperature of thermal properties of foods	276
Canning processes when g is less than 0.1	116
Capsicum spices, detection of foreign compounds in	468
Carotenoid stability in stored dehydrated carrots	164
Carotenoids as useful food colors	520
Cell wall suspensions, tomato juice, viscosity of	420
Cereals, improvement of, with defatted wheat germ	585
Cereals, packaged, dry, antioxidant treatment of paperboard for increased shelf life of	589
Cheese, process, use of light-screening agent for retarding oxidation of	577
Chemical and bacteriological evaluations to determine application of antibiotics in salmon canning	132
Cherries, red, sour, pitted, low moisture	610
Cherries, red tart, causes of scald in	94
Cherries, frozen, red sour pitted, time-temperature tolerance of	36
Chill-tank slush ice, re-use of, and effect on market quality of eviscerated broilers	257
Chilli spices, detection of foreign compounds in	468
Chlorophyll, conversion of, to pheophytin	428
Chlortetracycline for preserving Gulf oysters	237
Citrus concentrates, sanitary control in processing, sources of contamination	573
Citrus juices, enterococcus-like organisms in	337
Citrus juices, technological consideration in the bulk transportation of	579
Closed cycle biological systems for space feeding	449-459
Clumping in canned blueberries	99
Coffee, color of	505
Coffee powder, instant, nutritional study of	485
Cold storage, jacketed room	602
Color data, conversion of, from one system into another	167
Color measurements of foods	403
Color of canned sockeye salmon, prediction of, from color of raw flesh	44
Color of coffee	505
Color of frozen packaged retail beef cuts, effect of storage on	663
Colorimetry of baby foods	273
Coloring fat-base foods with beta-carotene	527
Coloring water-base foods with beta-carotene	536
Colors, food, industrial syntheses of carotenoids as useful	520
Consistency of tomato paste	356
Consumer opinion of canned Bartlett pears, factors influencing	284
Consumer reaction to riboflavin enriched rice	620
Consumer responses to canned cling peaches, comparison of mass panel with	693
Consumer survey vs. panel testing for acceptance evaluation of Maine sardines	222
Containers, unopened, estimation of vacuum in	473
Continuous jelly manufacture	252
Cooked meat products, dehydrated	398
Cucumber fermentation, use of Scuppernong grape leaves to inhibit pectinolytic and cellulytic enzymes in	204
Curing ingredients, effect of, on shelf stability of canned comminuted meats	551
Curing salts, effect of, on oxidative changes in radiation sterilized pork	681
Curing, storage, dehydration, effect of, on mono- and disaccharides of the sweet potato	150
Dairy waste treatment, application of laboratory data to	78
Dehydrated cooked meat products	398
Dehydration, effect of, on actomyosin	410
Dehydration, vacuum, United Kingdom advances	194
Dehydrocanned apples	417
Development and evaluation of potato chip bars	479
Dill pickles, quality of, effect of sucrose and type of spicing on	144
Drained weight of canned clingstone peaches, factors influencing	80
Dry yeast, activated, rehydration factors	359
Durum wheat, new varieties, cooking properties of	91
Enterococcus-like organisms in citrus juices	337
Enzymatic removal of excessive anthocyanin pigment	517
Enzyme inhibition in cucumber fermentation by Scuppernong grape leaves	204
Estimating bacterial count by resazurin reduction by microorganisms in fresh frozen vegetables	641
Factors affecting quality of prepackaged meat	17, 65, 159, 197, 301, 654
Feeding the army of tomorrow	667
Feeding crews in air vehicles of future	445
Fermentation, pickles, lindane residue changes during	281
Fish and fish products, freshness of, volatile reducing substance to assess	677
Fish freshness, problems in determining	260
Fish preservation, comparison of the tetracycline antibiotics for	108
Flavor, bread, radiation induced changes in	52
Flavor changes in oat products during storage, origin and prevention of	688
Flour, effect of wheat age on storage properties of	213
Fly egg counts, method for, in tomato products	391
Food additives amendment law of 1958	637
Food industry in a changing world	493
Foods, color measurements of	403
Foods, prepared, for Canadian Armed Forces	470
Foods, space feeding	429-459
Frankfurter quality as affected by sodium ascorbate, iso-ascorbate	311
Freezing, effect of, on hydration characteristics of rice	464
Freezing methods, effect of, on poultry meat quality	367
Freezing rate of eviscerated poultry frozen in air	183
Fresh vegetables aboard ships of the U. S. Navy, methods to extend storage of	548
Freshness, fish, problems in determining	260
Frozen breaded shrimp, market quality of	344
Frozen canned bread, moisture migration in	268
Frozen foods, precooked, bacteriological content of marketed	369
Frozen fruits for preserve manufacture, effects of sweeteners on	393
Frozen meals, precooked, microbiological quality of	190
Fryers, fresh, effect of bacterial inhibitors on shelf-life of	147
Gelatin, effects of ionizing radiation on	633
Glucose, methods of depleting from egg albumen before drying	186
Gluten, vital, functional properties of	629
Hams, cured, stability of, effect of various additives on	227
Heat, kinetics of bacterial inactivation by	4
Heat preservation of pressure dispensed food products	324
Heme derivatives in fresh meat	65
Household surveys, sampling method for, panel characteristics and their relation to wine usage	508

Subject *Page*

Household surveys, wine, panel-recruitment for 387
Hunter Color and Color-Difference Meter, sample rotator for 570
Hunter Color-Difference Meter, method of evaluating modifications in sample presentation 49

Informational bias in flavor testing 12

Jacketed cold storage room, studies on 602
Jelly manufacture, continuous 252

Kinetics of bacterial inactivation by heat 4

Light, effect of, on homogenized whole milk and fortified milk products 670
Light-screening agent for retarding oxidation of process cheese 577
Light transmittance techniques for maturity measurements of prune-type plums, evaluation of 595
Lindane residue changes during fermentation, processing of pickles 281
Low moisture, red sour pitted cherries 610
Lysine, fortification of bread with 169
Lysine, role of, in food products 496

Malonaldehyde, quantitative measurement of, use in measuring rancidity in fish by 2-thiobarbituric acid method 9
Malt and malt sprouts, antioxidants in 33
Maltosaccharides, penetration of, into processed clingstone peaches 111
Market frozen breaded shrimp, survey of quality of 344
Mathematical procedure for evaluating gamma radiation processes inside hollow cylinder sources 209
Maturity measurements of prune-type plums, evaluation of light transmittance techniques for 595
Maturity of fruit, instrument using light transmittance for non-destructive measurement of 592
Measurement of properties of shortening, relation to functional characteristics 674
Meat, prepackaged, determining the heme derivatives in fresh meat used for 65
Meat, prepackaged, factors affecting quality of, color studies on 17
Meats, canned, comminuted, effect of individual curing ingredients on the shelf stability of 551
Meats, cooked, protection of, with phosphates 240
Microbiological factors affecting quality of prepackaged meat 654
Microbiological methods for predicting the shelf life of dressed poultry 122
Microbiological quality of precooked frozen meals 190
Microbiological standards for foods 117
Microwave sublimation of foods 270
Military foods and feeding 470, 625, 667
Military foods and feeding 470, 625, 667, 699
Military foods, prepared 470
Military Subsistence Supply Agency 568
Milk and milk products, cobalt-60 radiation distillation to preserve 648
Milk, homogenized, whole, and fortified milk products, effect of light on 670
Modern baking concepts for troop feeding 625
Moisture and antioxidant treatment, effect of, on shelled English walnuts 599
Moisture condensation and cold-stored military rations 24
Monodosium glutamate and processed green beans flavor 372

Navy, U.S., methods to extend storage of fresh vegetables aboard ships of 548
New and improved products from Eastern (dry type) sweet potatoes 510
Nitrogen fertilization, effect on canning quality of Elberta peaches 174
Non-destructive measurement of fruit-maturity with instrument using light transmittance 591
Nutrition in space flight 433, 436
Nutritional study on instant coffee powder 485
Nutritive value of lysine-supplemented bread (rat studies) 169

Oat products, origin and prevention of undesirable flavor changes in, during storage 688
Objective measurements of beef tenderness 483
Objective quality tests of wheat, wheat products quality 291
Organoleptic characteristics of beef aged in controlled environments 86
Oysters, Gulf, preservation of, with chlortetracycline 237
Oxidation of process cheese, use of light-screening agent for retarding 577
Oxidative changes in radiation-sterilized pork, effect of variations in curing salts on 681
Oxygen scavenger, effect of, on precooked irradiated meat during short term high temperature storage 616

Package characteristics, atmospheric pressure in package and their effects on the microbiology of prepackaged meat 301
Packaged retail beef cuts, frozen, effect of storage on color of 663
Packages, retail, of frozen strawberries, raspberries, effect of fluctuating temperatures on 306
Packaging and antifungal agents for maintaining freshness of strawberries and raspberries 562
Packaging, factors affecting quality of prepackaged meat, effects of nitrogen and carbon dioxide on color 17
Packaging materials and techniques, effect of, on shelf life of fresh poultry meat 425
Packaging of pressurized foods 317, 320, 324, 330, 335
Packaging requirements for pressure propelled foods 320
Papain, commercial, in meat tenderization 248
Peaches, canned clingstone, factors affecting drained weight of 80
Peaches, cling, canned, comparison of mass panel and consumer responses to 693
Peaches, Elberta, canning quality of, as affected by nitrogen fertilization 174
Peaches, freestone, effect of bruising on quality of 196
Peaches, processed, clingstone, penetration of maltosaccharides into 111
Pears, Bartlett, canned, consumer opinion of 284
Pears, Bartlett, canned, influence of agronomical factors on quality of 375
Peas, deep-fat fried, quality evaluation of 351
Peroxidase, sweet corn, heat inactivation of 244
Peroxidase test paper in food processing 265
Phosphates, protecting cooked meats with 240
Pickles, processing and fermentation, effect on lindane residue 281
Pineapple juice powder 363
Popcorn, relation of sample size and temperature to volumetric expansion of 514
Potato chip bars, development and evaluation of 479
Potato granules, storage characteristics of 622
Poultry, dressed, microbiological methods for predicting shelf life of 122
Poultry, eviscerated, frozen in air, factors affecting freezing rate and appearance of 183
Poultry, fresh, and meat, fresh, simultaneous determination of total count and fluorescent pseudomonads in 255
Poultry, meat, effect of freezing method on quality 367
Poultry meat, fresh, effect of packaging materials and techniques on shelf life of 425
Poultry, tray-pack, freshly chilled, influence of scald temperatures, chill times on bacterial flora and shelf life of 684
Poultry wastes, problems in handling 180
Practical applications of laboratory data to dairy waste treatment 78

Subject	*Page*
Precooked irradiated meats, influence of short term, high temperature storage, with and without oxygen scavenger, on	616
Preference ratings for foods served at meals, variation in	30
Preference testing, tomato juice	1, 12, 55
Prepackaged meat, color studies on	17
Prepackaged meat, factors affecting, initial bacteria count, storage time and temperature, antioxidants, antibiotics	654
Prepackaged meat, factors affecting quality of	17, 65, 159, 197, 301
Prepackaged meat, factors affecting quality of, chemical tests associated with organoleptic quality	159
Prepackaged meat, factors affecting quality of, microbiological studies	197
Prepared foods for military use (British Army)	699
Preservative effect of vitamin K_3	501
Pressurized food field and the food processor	335
Pressurized food program, how a manufacturer can start a	330
Pressurized foods, history and background	317
Pressurized foods, packaging	317, 320, 324, 330, 335
Processes, canning, variation of thermal properties of foods with temperature	276
Pseudomonads, fluorescent, determination of total count, in fresh meat and poultry	255
Public health and precooked frozen foods	369
Pulverant solids, determination of gas space in	492
Pungent compounds, foreign, detection of, in capsicum	468
Quality evaluation of deep-fat fried peas	351
Radiated meat, precooked, use of oxygen scavenger with, during short term, high temperature storage	616
Radiation, Cobalt-60, distillation for preserving milk and milk products, storage studies	648
Radiation, effect of, on antibiotic-treated meats	582
Radiation, gamma, theoretical considerations in food processing by	209
Radiation, ionizing, effect on gelatin	633
Radiation-induced changes in bread flavor	52
Radiation-sterilized pork, effect of variation in curing salts on oxidative changes in	681
Rancidity in fishery products, 2-thiobarbituric acid method for	9
Raspberries, strawberries, frozen, retail packages of, and time-temperature tolerance	306
Raspberries, strawberries, using selected packaging and antifungal agents to maintain freshness of	562
Rations, military, moisture condensation on cold-stored	24
Refrigerated storage of shrimp, effect of delayed handling on quality during	297
Resazurin reduction by microorganisms in fresh frozen vegetables, use of, to estimate bacterial count	641
Riboflavin-enriched rice, consumer reaction to	620
Rice enriched with riboflavin, consumer reaction to	620
Rice, hydration characteristics of, after freezing	464
Ripeness, temperature, growing area, as influences on Bartlett pear quality	375
Rotator, for samples submitted to Hunter Color and Color-Difference meter	570
Russian materials on food and food technology, location of, in U.S.	634
Salmon, sockeye, canned, predicting the color of the canned product from the raw flesh	44
Sample, quantity of, in preference testing	1
Sampling method for household surveys, wine	387
Sanitary commissions, state, their role in waste control	137
Sardines, Maine, evaluation of, by consumer survey and panel testing	222
Scald, causes of, in red tart cherries	94
Scald in cherries, relationship between bruising and respiration in water	102
Scald temperatures, chill times, holding temperatures, influence of, on bacterial flora and shelf-life of freshly chilled tray-pack poultry	684
Scoring scales for objective quality scores for evaluating food product quality	127
Sensory difference tests	231
Shortening, properties of, relation to functional characteristics	674
Shrimp quality, biochemical methods for	340, 344
Shrimp quality, effect of delayed handling	297
Shrinkage and organoleptic characteristics of beef aged in controlled environments	86
Sodium ascorbate, sodium iso-ascorbate, effect of, on frankfurter quality	311
Space feeding, present capabilities, future needs	442
Space feeding problems, a bibliography	459
Space feeding problems, observations on	430
Space operations, nutrition in	433
Spoilage, fish, changes in total volatile base, volatile reducing substances, bacterial count as spoilage indices for fresh water fish	385
Spray-dried tomato powder, factors affecting storage stability of	542
Statistical development of objective quality scores for food product quality	127
Storage changes in tomato juice	380
Storage characteristics of potato granules	622
Strawberries, frozen, ascorbic acid, its oxidation products as measure of temperature history	645
Subjective measurements of beef tenderness	483
Sucrose and spicing, effect of, on quality of processed dill pickles	144
Survey of market frozen breaded shrimp quality	344
Swallowing, rinsing factors in preference testing	1
Sweet corn peroxidase, heat inactivation of	244
Sweeteners, effect of, on frozen fruits for preserve manufacture	393
Sweet potato, mono- and disaccharides of, effect of curing, storage, dehydration on	150
Sweet potatoes, preparation of chips, dice, julienne strips, and frozen french fried from	510
Tenderization, meat, with papain	248
Tenderness, beef, objective and subjective measurements of	483
Test location and accompanying sound as influences on preference tests	55
Test paper, peroxidase, use in food processing	265
Tetracycline antibiotics, comparative effectiveness of, for fish preservation	108
2-Thiobarbituric acid method for rancidity in fish	9
Time-temperature tolerance of frozen foods, indices of temperature history of frozen strawberries	645
Time-temperature tolerance of frozen foods, retail packs of frozen red sour pitted cherries	36
Time-temperature tolerance of frozen foods, retail packages of frozen strawberries and raspberries	306
Time-temperature tolerance of frozen foods, turkey dinners and turkey pies	40
Tomato juice, high viscosity of cell wall suspensions prepared from	420
Tomato juice, preference testing of	1, 12, 55
Tomato juice, storage changes in	380
Tomato paste, consistency of	356
Tomato paste, objective criteria for storage changes	347
Tomato powder, spray-dried, factors affecting storage stability of	542
Tomato products, method for fly egg counts in	391
Trimming time and yield factors in processing applesauce	57
Troop feeding (U.S.), modern baking concepts for	625
Turkey dinners and turkey pies, frozen, time-temperature tolerance of	40
Turkeys, storage life of, effect of antibiotic treatment on	660

Subject	*Page*
Vacuum, estimation of, in unopened containers	473
Variations in preference ratings for foods served at meals	30
Vital gluten, functional properties of	629
Vitamin K_3 as food preservative	501
Volatile acidic flavor component of apple sauce	613
Volatile reducing substances as indicator for fresh water fish spoilage	385
Volatile reducing substances to assess freshness of fish, fish products	677
Volumetric expansion of popcorn, relation of sample size and temperature to	514
Walnuts, English, shelled, effect of moisture and antioxidant treatment on	599
Waste control, role of state sanitary commissions in	137
Wastes, poultry, problems in handling	180
Wheat age, effect of, on storage properties of flour	213
Wheat germ, defatted, improving cereals with	585
Wheat, new durum varieties, cooking properties of	91
Wheat, wheat products, objective quality tests of	291
Wheat-and-rice bread, new type of bread	15
Wine usage, sampling method for household surveys of, panel characteristics	508

Book Review Index, Volume 12, 1958

	Page
ADVANCES IN PROTEIN CHEMISTRY. Vol. 12, Ed. by C. B. Anfinsen, Jr., M. L. Anson, K. Bailey and J. T. Edsall. (M. A. Joslyn) (6)	*31*
ATOMIC ENERGY IN AGRICULTURE. By William E. Dick. (Martin S. Peterson) (2)	*22*
BIOGRAPHY OF FOOD. By E. Alan Baker and D. J. Foskett. (Martin S. Peterson) (10)	*24*
BIOLOGIA ET INDUSTRIA I. Ed. by W. Roman. (H. J. Phaff) (8)	*26*
CEREAL LABORATORY METHODS. 6th Edition. Ed. by Emery C. Swanson. (Robert B. Koch) (5)	*50*
CHEMISTRY OF PLANTS. By Erston V. Miller. (Robert G. Tischer) (6)	*31*
FLAVOR RESEARCH AND FOOD ACCEPTANCE. Sponsored by Arthur D. Little, Inc. (Martin S. Peterson) (12)	—
FREEZING PRESERVATION OF FOODS. Volume II. By Donald K. Tressler and Clifford F. Evers. (Joseph W. Barclay) (2)	*18*
INTRODUCTION TO PROTEIN CHEMISTRY. By Sidney W. Fox and Joseph E. Foster. (G. E. Livingston) (4)	*38*
LABORATORIUMSBUCH FUR DEN LEBENSMITTELCHEMIKER. By A. Beythien and revised by W. Diemoir and others. (M. A. Joslyn) (8)	*27*
LIGHT, VEGETATION AND CHLOROPHYLL. By J. Terrien, G. Truffaut and J. Carlos. (Frank A. Lee) (8)	*27*
THE LIPIDS, THEIR CHEMISTRY AND BIOCHEMISTRY. Volume III. Biochemistry. By Harry J. Deuel, Jr. (Robert B. Koch) (11)	—
MICROBIOLOGY. By Michael J. Pelczar, Jr. and Roger D. Reid. (R. O. Wagenaar) (11)	—
STERILIZATION IN FOOD TECHNOLOGY. THEORY, PRACTICE, AND CALCULATIONS. By C. Olin Ball and F. C. W. Olson. (J. M. Jackson) (1)	*37*
